## 11.2 Definition of Response Time

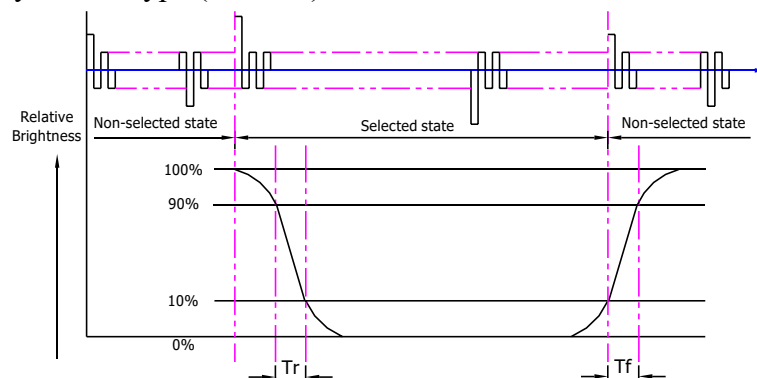

### 11.2.1 Normally Black Type (Negative)

$T_r$  is the time it takes to change from non-selected state with relative luminance 10% to selected state with relative luminance 90%;

$T_f$  is the time it takes to change from selected state with relative luminance 90% to non-selected state with relative luminance 10%.

### 11.2.2 Normally White Type (Positive)

$T_r$  is the time it takes to change from non-selected state with relative luminance 90% to selected state with relative luminance 10%;

$T_f$  is the time it takes to change from selected state with relative luminance 10% to non-selected state with relative luminance 90%;

## 11.3 Definition of Contrast Ratio

Contrast is measured perpendicular to display surface in reflective and transmissive mode. The measurement condition is:

Measuring Equipment	BM-7 or EQUI
Measuring Point Diameter	3mm/1mm
Measuring Point Location	Active Area centre point
Test pattern	A: All Pixels white
	B: All Pixel black
Contrast setting	Maximum

Definitions: CR (Contrast) = Luminance of White Pixel / Luminance of Black Pixel

#### 11.4 Definition of Viewing Angles

Measuring machine: LCD-5100 or EQUI

#### 11.5 Definition of Color Appearance

R,G,B and W are defined by (x, y) on the IE chromaticity diagram

NTSC=area of RGB triangle/area of NTSC triangleX100%

Measuring picture: Red, Green, Blue and White (Measuring machine: BM-7)

#### 11.6 Definition of Surface Luminance, Uniformity and Transmittance

Using the transmissive mode measurement approach, measure the white screen luminance of the display panel and backlight.

11.6.1 Surface Luminance:  $LV = \text{average (LP1:LP5)}$

11.6.2 Uniformity =  $\text{Minimal (LP1:LP5)} / \text{Maximal (LP1:LP5)} * 100\%$

11.6.3 Transmittance =  $\text{LV on LCD} / \text{LV on Backlight} * 100\%$

Note :Measuring machine:BM-7

## 12 Quality Assurance

### 12.1 Purpose

This standard for Quality Assurance assures the quality of LCD module products supplied to customer by RRJ-DISPLAY display.

### 12.2 Agreement Items

RRJ-DISPLAY and customer shall negotiate if the following situation occurs:

12.2.1 Discrepancies between RRJ-DISPLAY's QA standards and customer's QA standards.

12.2.2 Additional requirement to be added in product specification.

12.2.3 Any other special problem.

### 12.3 Standard of the Product Visual Inspection

12.3.1 Appearance inspection:

12.3.1.1 The inspection must be under illumination about 1000 – 1500 lx, and the distance of view must be at  $30\text{cm} \pm 2\text{cm}$ .

12.3.1.2 The viewing angle should be  $45^\circ$  from the vertical line without reflection light or follows customer's viewing angle specifications.

12.3.1.3 Definition of area: A Zone: Active Area, B Zone: Viewing Area.

12.3.2 Basic principle: A set of sample to indicate the limit of acceptable quality level must be discussed by both RRJ-DISPLAY and customer when there is any dispute happened.

Note 1. For humidity test, DI water should be used.

Inspection Standard: Inspect after 1-2hrs storage at room temperature, the sample shall be free from the following defects:

- Air bubble in the LCD
- Seal Leakage
- Non-display
- Missing Segment
- Glass Crack
- IDD is greater than twice initial value.
- Others as per QA Inspection Criteria

Note 2. No defect is allowed after testing

The End Product ESD value is only indicative and depends on customer ESD protection design for the whole system.

Note 3. ESD should be applied to LCD glass panel, not other areas (such as on IC and so on) IDD should be within twice initial value.

In case of malfunction defect caused by ESD damage, if it would be recovered to normal state after resetting, it would be judged as a good part.

Note 4. Only upon request.

## 14 Precautions and Warranty

### 14.1 Safety

14.1.1 The liquid crystal in the LCD is poisonous. Do not put it in your mouth. If the liquid crystal touches your skin or clothes, wash it off immediately using soap and water.

14.1.2 Since the liquid crystal cells are made of glass, do not apply strong impact on them. Handle with care.

### 14.2 Handling

14.2.1 Reverse and use within ratings in order to keep performance and prevent damage.

14.2.2 Do not wipe the polarizer with dry cloth, as it might cause scratch. If the surface of the LCD needs to be cleaned, wipe it swiftly with cotton or other soft cloth soaked with petroleum IPA, do not use other chemicals.

### 14.3 Operation

14.3.1 Do not drive LCD with DC voltage

14.3.2 Response time will increase below lower temperature

14.3.3 Display may change color with different temperature

14.3.4 Mechanical disturbance during operation, such as pressing on the display area, may cause the segments to appear “fractured”.

### 14.4 Static Electricity

14.4.1 CMOS LSIs are equipped in this unit, so care must be taken to avoid the electro-static charge, by ground human body, etc.

14.4.2 The normal static prevention measures should be observed for work clothes and benches.

14.4.3 The module should be kept into anti-static bags or other containers resistant to static for storage.

### 14.5 Limited Warranty

14.5.1 Unless otherwise agreed between MJT-DISPLAY and customer, MJT-DISPLAY will replace or repair any of its LCD and LCM which MJT-DISPLAY found to be defective electrically and visually when inspected in accordance with MJT-DISPLAY Quality Standards, for a period of one year from date of shipment.

14.5.2 The warranty liability of MJT-DISPLAY is limited to repair and/or replacement. MJT-DISPLAY will not be responsible for any consequential loss.

14.5.3 If possible, we suggest you use up all modules in six months. If the module storage time over twelve months, we suggest that recheck it before the module be used.

## 15 Packaging

TBD

## 16 Prior Consult Matter

1. For MJT-DISPLAY standard products, we keep the right to change material, process for improving the product property without prior notice to our customer.

2. For OEM products, if any changes are needed which may affect the product property, we will consult with our customer in advance.

3. If you have special requirement about reliability condition, please let us know before you start the test on our samples.
